Step 1: Using the versamark ink pad, apply the ink directly to the brushed silver cardstock. Make sure you press firmly and cover your area well.

Step 2: Pour silver embossing powder directly onto the cardstock. Tap off excess.

Step 3: Heat the embossing powder with the heat tool until the powder turns into a shimmery silver. Once it cools down repeat step 1 & 2 two more times.

Step 4: Ink up your stamp with versamark and set aside. After covering and heating your paper with your third layer, quickly stamp the versamark inked flower into the hot embossed cardstock. Press down, wiggle and pull up.

Voila! You have yourself a beautiful faux metal layer!
