You don't need to be a watercolor artist to look like one! The Wonderful Watercolors stamp set gives you beautiful watercolor-ready images that will look like they came straight from your magical watercolor brush. These Two-Step Stampin' flowers will help you display your creative genius—without the hard work—while the beautiful sentiments make this a set you can't do without.

Create elegant images with a touch of gold and colouring...here's how:

Take your Whisper White cardstock and swipe it with your embossing buddy (to remove static). Stamp image using versamark, cover with Gold Embossing Powder, tap off excess and melt using your Heat Tool.

Use your Stampin' Write Markers to colour the background of flower and leaves. In this sample, Pretty in Pink and Certainly Celery were used.

Add your darker colours of Stampin' Write Markers to create highlights. In this sample, Regal Rose and Always Artichoke were used.
